Art + Architecture *The Ebsworth Collection + Residence*

This ground-breaking volume invites the reader into the elegant Seattle home of influential collector Barney A. Ebsworth, owner of one of the most important private collections of modern American art. The house was designed specifically for the collection, which includes seminal paintings and sculptures by Hopper, de Kooning, Pollock, O'Keefe, Johns, Hockney and Calder, among many others.

Art + Architecture is one of the first examinations of how a top-flight collector works with an architecture firm (Olson Sundberg Kundig Allen) in order to explore the alchemy that allows a great work of art to exist independently within a functioning single family residence.

This book includes lavish color reproductions of the works and photographs in situ of each piece. With an essay by Franklin Kelly, curator of British and American art at the National Gallery.

This book is a must for both architecture and art aficionados.
